cannot be known here before May, and I have no reason to be sanguine of their mature, I can already see the benefit of the extra study on our hix candidates, five of whom ontered for the junior and the other for the senior examination. It is also worthy of note, as a sign of the interest taken by Chinese parents in their sous' education, that in no case was any demar made; about paying the seven dollars entrance fee. This year I have instituted a Boys self-supporting Lending Library. Money was advanced to procure books from England. A varied se. The anbscription was put at ten cents a month, and

we have had an average of no less than 74 boys, mostly Chinese, subscribers monthly. We may expect great results in English composition, and in the acquirement of good collequial English when our boys find pleasure in reading English standard authors, and in making acquaintance with the customs and conversation of every day English life as represented in our leading novels. Six pupil teachers have been articled for a period of three years, having deposited a security of one hundred dollars each, to provide the six additional Chinese assistants that will be required in the New School. It was with BEFORE THE HON. SIE GEORGE PHILLIPPO considerable joy that all masters, boys, and friends of the school read the statement made by your Excellency at the opening of the

Legislative Council that the New School would It is semi-officially stated in the Paris, Vienna be opened early in 1888. Two-thirds of the walls are already raised, and it is most earnestly to be desired that no stone be left unturned to admit of the new building being occupied after Chinese New Year at the and of February, or early in March, next year. By this means the change would take place at the time of our annual promotions and a better chance would be afforded for obtaining a full school; besides, the important consideration of a complete year's study in guilty. the new subjects would be secured.

HIS EXCELLENCY-Mr. Wright, ladies and gentlemen. I have listened with great interest and pleasure, as I have no doubt all of you have: done, to the report just read by Mr. Wright, Head Master of this school. As usual this report has been of a highly satisfactory character. In fact, under the able management of Mr. Wright and his assistants, I should have been much surprised if it had not been a satisfactory one. I am and a it will be a matter of gratification to all a to take an interest in this school to see the progress that has been made in the erection of the new Victoria College close by here, to which place the echolars are to be transferred as soon as it is completed. (Applause). It is believed that this new college will be completed about Mr. Gladstone has written a letter supporting. March or April next year. I hope it will be finished in time to transfer all the boys there by. the end of the next Chinese New Year holidays. as Mr. Wright has expressed the hope they will be. Still, after a building has been completed there are always a great number of internal fittings and arrangements to be made, and I cannot feel entirely confident that it will be ready at that time. About one thing, however, I do feel confident, and that is that this is the last time the be quite possible to get ready the Theatre or

large Central Hall of the new Victoria (ollege in time for the next distribution of prizes. (Loud applause). There will be ample accommodation in the new Victoria College for about 170 more boys than it has been possible to take, even with crowding, in this place. That necessitates, of course, an increase in the staff of masters. have received, two days ago, from Mr. Wright a very able and carefully drawn report showing made. I have hardly had time to consider this report yet, but it will have the careful consideration of the Government and the necessary arrangments will be made before the new building is opened. ment with regard to the Government Scholarship. On a recent occasion, at the distribution stated that, after consulting Dr. Stewart, the Acting Colonial Secretary, who still takes the greatest interest in all matters connected with education, that as the two competitors for this scholarship had failed last year to attain the necessary number of marks to win the Scholarship,

and it was consequently not given, the next Scholarship would be offered to competition this year instead of in 1888, the date for which it was originally fixed. I thought it was hardly worth while for the Government to make the that announcement. I have since been infermed, however, by the directors and managers of public institutions likely to compete for this fair to those who have commenced their studies for the next scholarship, which was to have been vice.

therefore, withdraw the announcement I then made, and the next examination will take place in 1888, at the time originally fixed. I will now proceed to the distribution of prizes The school will, I believe, break up after this for the holi-

AFRICA. THE MANDI'S STORY OF THE FALL OF KHAPTOUM.

NEW YORK, 21st December. The Herald says: That the first official news of the fall of Kharloum should be received in England from the Mahdi himself, is one of those grim strokes of realism in which historical nove lists are apt to indulge. Yet the fact itself seems beyond question. The communication first posed by that officer. reached Emin Pasha, the Turkish Viceroy of Equatorial Africa, who forwarded a copy of it to the British Consul-General at Zanzibar, this official transmitting the news to England. The Mahdi's letter has a melancholy and terrible interest. It describes in true Oriental phraseology troops of God " " hewed with swords and stabbed with spear." How the "enomies of God were taken out and killed properly." and how none were left but little children and slaves." ENGLISH AND CHINESE DICTIONARY. WITH THE PUNTI AND MANDARIN Pronunciation. An Angle-Chinese Dictionary, published at the Daily Press Office, Hongkong.

For comprehensiveness and practical service this Work stands unrivalled. All the new alloe. words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy. to 2 catties. of foreign relations has imposed upon them, are here given in extenso. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Punti pronunciations are given the accents being carefully marked on the best principle hitherto attained. The typography displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore charactorized Chinese publications. To the illustrate the vast scope of the work

following facts are submitted for consideration:-Chalmers' Vocabulary contains about 16.000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the student of 'his difficult language absolutely requires examples to display the various applications and equivalents of different words which have one general meaning. Of these examples this work contains more than five times as many as any other Dictionary bitherte pub-

For practical purposes the arrangement of the work is so complete, that a reference to its pages embles a person who understands English to communicate effectively with natives who understand nothing but Chinese. In this respect Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. o parties resident in England and interested
